

Media Release 11 June 2008

Best Fund on Planet ERF

AUSfund Dominates Benchmarking Report

AUSfund's position as the leading Eligible Rollover Fund (ERF) has been confirmed in the latest SuperRatings report into the sector. For the third consecutive year AUSfund gained a Platinum rating and was again recognised as ERF of The Year, a repeat of last year's award from the ratings agency.

A total of 15 ERFs were reviewed in the recently released "SuperRating's ERF Rating and Benchmark Report – 2007". Of the remaining 14 funds, 7 received only a Silver award and 7 were not rated. No funds received a Gold award meaning there was a significant gap between AUSfund and the other ERFs.

"Our continued performance across a range of indicators has led to these awards. Net Benefit to Member analysis on a \$1,000 account balance has AUSfund leading the 1, 3 and 5 year tables. Similar rankings also apply on \$2,000 and \$5,000 balances over 1, 3 and 5 years" AUSfund Manager Warren Fawcett said.

"Net investment returns have been consistent and competitive with AUSfund ranked 2nd over the 1 year period to 30 June 2007, 3rd over 3 years and 1st over 5 years".

"The report also recognised AUSfund's' high level of member services, continued efforts to re-unite members with their lost super through cross fund matching, address matching, ATO matching, online services and a unique commitment to public advertising through both television and radio".

'The report has again confirmed AUSfund is providing the best net benefits to members of all account sizes on an ongoing basis and was most active in the identification of lost members and provision of services to super funds" he said.
